

WHAT IS CLAIMED IS:

- Sub. a) 1. A method for producing letter envelopes from a moving web of material in an envelope producing machine comprising the steps of:
- (a) applying printed images to the web;
 - (b) cutting the web to form at least one blank of a selected size with a printed image;
 - (c) removing one of said blanks from the machine;
 - (d) using the removed blank to determine the actual spacing of the printed image from a reference edge of the blank;
 - (e) computing the difference between the determined actual spacing of the printed image from the reference edge and a preset nominal spacing of the printed image from the reference edge; and
 - (f) inputting the difference between the actual and the nominal spacing in a controller as a corrective value.
